

ONE PORTAL, THOUSANDS
OF RESOURCES
PARTNERSHIP BROCHURE

WHAT IS

RESEARCH4LIFE

Since 2012, Research4Life has provided 11,000+ institutions in 125+ lower income countries with free or low-cost access to 200,000+ peer-reviewed international journals, books and databases. It supports the UN Sustainable Development Goals to reduce inequalities and ensure equal opportunities for all.

- **Online access to thousands of resources:** Available in several languages and covering a wealth of topics.
- **Authors and Librarians Hubs:** Free training materials for librarians, information specialists and researchers to improve professional skills.
- **Research4Life Massive Open Online Course and Virtual Master Trainer Course:** Helping users get the most out of Research4Life, and enhancing critical training skills.
- **Research4Life webinars:** Specially developed webinars covering best practices for using Research4Life, as well as improving research skills.
- **Partners resources:** Free resources for librarians and researchers, additional toolkits and learning programs.
- **Institution support:** Helpdesk ensuring institutional access, and providing regular information on the content and services available.

“

I can't imagine being able to do my research without Research4Life. Neurosurgery is a rapidly evolving field, and Research4Life allows me to read what I need to be able to stay up to date.

Dr. Pratyush Shrestha

THE PARTNERS

The Research4Life partnership comprises many partner organizations:

- Content Providers: 200+ publishers, and the International Association of Scientific, Technical & Medical Publishers (STM)
- Programme Coordinators: FAO, ILO, UNEP, WHO and WIPO
- University Partners: Cornell and Yale Universities
- Training, Service and Technical: : Information Training and Outreach Center for Africa (ITOCA), ProQuest (Serials Solutions), PortSys and the National Library of Medicine (US)
- User Community: Members of the User Group, champions, advocates, and formal or informal Connectors and ambassadors raising users' voices with Research4Life and beyond.

ELIGIBILITY

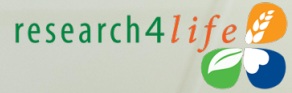

Publicly funded non-profit institutions in most low and middle income countries are eligible to register for access to the Research4Life content. A detailed list of qualifying countries can be found at: www.research4life.org/eligibility.

Please note that for some countries there are some exceptions to eligibility for certain titles. In addition, the eligibility of countries, areas, and territories will change as their development indicators change. If you have any questions regarding technical details and requirements, please email the Research4Life helpdesk: r4l@research4life.org.

“

The wealth of information available in Research4Life can transform your research for life. It has worked for me. It will surely work for you.
